

June 3, 2025

To our valued distribution partner,

We would like to inform you of an important pricing update: due to the evolving tariff situation and increased costs of key components, we will be implementing a 3% price increase on Baseline irrigation controllers, effective July 1, 2025.

We continue to work closely with our supply chain partners—both for current needs and future planning—to minimize any additional impact on you and your customers. We encourage you to place orders before June 30 to take advantage of current pricing and stock up for any upcoming projects or inventory needs.

As always, we appreciate your partnership and are here to help you navigate any questions about product availability or pricing changes.

Best regards,

A handwritten signature in blue ink, appearing to read "Bob Beers", is positioned above the printed name.
